NEVER MISS A LEAD

CLIENT GUIDE · TEXT-BACK

Your guide to never missing a lead

Text-Back plan

Missed callers on UK mobiles get a text from your business. You get the alert. Everything you need to set up, use and get the most from it.

- Setup videos
- Call diverts
- Phone notifications
- Dashboard
- #code replies
- Quick reference

A service from BIG BARK MEDIA

Version 1.1 · 20 October 2026
info@bigbark.media · 07822 882162

START HERE

The short version

We've set everything up behind the scenes. Here are your jobs, on one page. Videos for each: **nevermiss.bigbark.media/setup/**

1 Get set up

about 15 minutes, once

1 Sign in

Go to **my.bigbark.media**, tap **Email me a sign-in code** and type the 6-digit code.

2 Add it to your Home Screen

iPhone: Safari → **Share** → **Add to Home Screen** → **Add**. Android: Chrome → ⋮ → **Add to Home screen** (or **Install app**) → **Install**.

3 Turn on phone notifications

Open it from the Home Screen icon → **Settings** → **Phone notifications** → **Turn on notifications on this phone** → **Allow** → **Send a test notification**.

4 Divert your missed calls

`**61*NUMBER#`, `**67*NUMBER#`, `**62*NUMBER#`. Check with `*#61#`.

5 Test it

Ring your mobile from another phone and don't answer. The other phone gets your text and you get an alert.

2 Every day

1 You miss a call, you get an alert

Phone notification, text or email, with a link and the #code.

2 Reply in the dashboard

Type in **Write a text...**, tap the send arrow.

3 Or reply by text

Text your Never Miss a Lead number: `#4821 Yes, Thursday at 10 is free`

4 Call them back

Tap the pink phone button.

★ **On your phone? Use the Quick Start**

The same steps with big text and a tick box for each: **never-miss-a-lead-text-back-quick-start.pdf**. Stuck? Email **info@bigbark.media** or WhatsApp **07822 882162**.

We set everything up behind the scenes. When your number's live, we email you your dashboard link and short setup videos. Stuck? Email **info@bigbark.media** or WhatsApp **07822 882162**.

YOUR PLAN

1 Welcome to Never Miss a Lead

You can’t answer the phone mid-session with a reactive dog, out on a walk or driving between clients. Never Miss a Lead makes sure the people who ring you still hear from your business while they’re deciding who to book.

Text-Back

£49 a month inc. VAT · £39 for Big Bark hosting clients

- Instant text to missed callers on UK mobiles, in your business’s name
- Voicemail recorded and sent to you
- Phone notification, text or email for every missed call and reply
- Reply from your dashboard or by text (#codes)
- Website “Text us” button
- Dashboard with results and a monthly report

Yearly option: £490 a year (2 months free). All prices include VAT. No contract: cancel any time.

Your Never Miss a Lead number

We give you one UK number that works behind the scenes. You keep your own mobile number, and callers notice nothing different.

How calls reach us	Your mobile rings as normal. Calls you **don’t answer**, calls when you’re **busy** and calls when your phone is **off or out of signal** are diverted to your Never Miss a Lead number (section 4 shows you how). Calls you answer never touch our system.
Texts and alerts	Texts to your callers come from your Never Miss a Lead number, in your business’s name. Text alerts to you come from it too, so save it in your phone as “Never Miss a Lead”.
If your phone can’t divert	Some networks and plans can’t divert (for example VOXI, Lebara and Vodafone pay as you go). Then you put your Never Miss a Lead number on your website, Google profile and ads instead. It rings your mobile first, and you hear “Never Miss a Lead call. Press 1 to take it.” Press 1 and you’re straight through; if you don’t, we handle it as a missed call. Up to 225 minutes a month of calls are put through to you this way. After that, until the 1st, callers get your greeting, voicemail and text instead (you still get every lead), and we’ll tell you.

Most important thing to do first

Set up your call diverts (section 4) and test them. Without the diverts, calls you miss on your own mobile go to your old voicemail and we never see them.

NO CALLS NEEDED

2 Getting set up

We set everything up behind the scenes. When your number's live, we email you (**"You're live on Never Miss a Lead"**) with your Never Miss a Lead number, your dashboard link and three quick jobs. Each job has a short video. Stuck? Email or WhatsApp us.

What we do, behind the scenes

- Register and verify your Never Miss a Lead number (UK rules mean this takes a few working days).
- Write your texts from your onboarding form.
- Add the website button, if Big Bark hosts your website.

Setup videos	
1	Getting started
2	Get alerts on your phone
3	Divert your missed calls
4	Replying to enquiries

At **nevermiss.bigbark.media/setup/**, a few minutes each.

What you do (about 15 minutes)

1. **Get alerts on your phone**
   Sign in to your dashboard, add it to your Home Screen and turn on notifications (section 5).
2. **Divert your missed calls**
   Dial the three codes from the go-live email (section 4).
3. **Test it**
   Ring your mobile from another phone and let it ring out: you get an alert and the other phone gets your text.

> **Your free trial starts when your number goes live**
> Not the day you sign up, so you get the full 7 days. We email you 3 days before it ends. Cancel before then and you pay nothing. Help is by email (info@bigbark.media) or WhatsApp (07822 882162); we reply within 3 working days and don't do phone support, so you'll always have our answer in writing.

HOW IT WORKS

3 What happens when you miss a call

1 Someone rings and you can't answer

Your mobile rings as normal. If you don't answer, you're busy or you have no signal, your divert sends the call on to your Never Miss a Lead number.

2 They hear your greeting and can leave a voicemail

A British voice reads your greeting. Ours is: "Sorry we missed your call. Please leave a short message after the tone and we'll call you back. Messages are recorded." Voicemails can be up to 2 minutes.

3 They get a text from your business within seconds

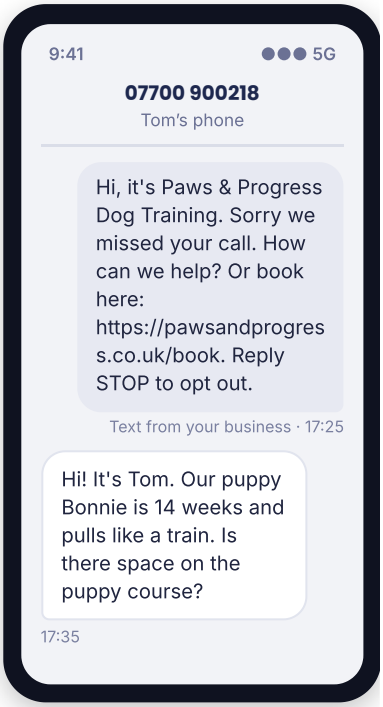

If they rang from a UK mobile, they get your auto-text straight away: "Hi, it's {your business}. Sorry we missed your call. How can we help? Or book here: {your booking link}. Reply STOP to opt out."

4 You get an alert

A phone notification, text and/or email: who called, with a link to the conversation and its 4-digit #code. Voicemails get their own alert.

5 They reply, you reply

Their reply lands in your dashboard and you get an alert. Reply from the dashboard or by texting **#code** and your message.

What the caller sees. You choose the wording in Settings.

Who gets a text

Many callers don't leave a voicemail, so the text matters. It goes to callers on UK mobiles only:

Caller	What happens
UK mobile (07…)	They get your auto-text and can leave a voicemail.
Landline, withheld or overseas	No text (we can't text them). They can leave a voicemail. Your alert asks you to call them back, or says the number was withheld.
Rang again within 30 minutes	We don't text them twice. Your alert says "…again, already texted in the last 30 min."
Has replied STOP before	No text. Your alert says they opted out of texts, so please call them back.

ONE-OFF SETUP, 5 MINUTES · VIDEO 3

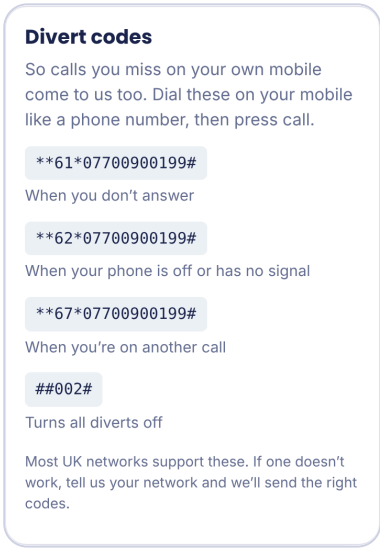

4 Setting up your call diverts

Your mobile can send calls you don't pick up to your Never Miss a Lead number. You set this up once by dialling a short code, just like making a call. Your phone still rings first. In the codes below, replace **NUMBER** with your Never Miss a Lead number (it's in the go-live email, and your codes are ready-made in **Settings → Divert codes**). Type it as `07...` or `+447...`; Vodafone prefers the `+44` version.

When	Turn on	Check it's on	Turn off
You don't answer	`**61*NUMBER#`	`*#61#`	`##61#`
You're busy, on another call or press decline	`**67*NUMBER#`	`*#67#`	`##67#`
Your phone is off or has no signal	`**62*NUMBER#`	`*#62#`	`##62#`
Turn **all** diverts off at once (this also turns off your normal voicemail, so set that up again afterwards)			`##002#`

How to set them up

1. **Open your phone's keypad**
   The same screen you use to dial a number.
2. **Dial the first code and press call**
   For example `**61*07700900199#`. You'll see a message saying the divert is registered or activated.
3. **Do the other two**
   `**67*NUMBER#` then `**62*NUMBER#`. We recommend all three.
4. **Check**
   Dial `*#61#`: it should show your Never Miss a Lead number.
5. **Test it**
   See below. Video 3, "Divert your missed calls", shows every step.

Your codes, with your number filled in, are in Settings → Divert codes.

How long your phone rings first

Most networks ring for about 15 to 20 seconds before diverting. To choose the time yourself, use this version of the first code instead: `**61*NUMBER*11*20#` (Vodafone: `**61*NUMBER*10*20#`). The last number is seconds of ringing: 5, 10, 15, 20, 25 or 30.

Test it

1. **Ring your mobile from another phone and let it ring out**
   Don't answer and don't decline.

2. **Listen**
   You should hear your Never Miss a Lead greeting. If the other phone is a mobile, it should get your text within a few seconds.

3. **Check your alert**
   You should get the missed-call alert and see the call in your dashboard under **Calls**.

> **!** **If the call goes to your old voicemail**
> The divert didn't take. Dial `*#61#` to check, then dial the code again. Still stuck? Ask your network to "set a conditional divert on no answer, busy and unreachable to" your Never Miss a Lead number, or email or WhatsApp us your network's name.

By network

Network	Notes
EE, BT Mobile (pay monthly)	Standard codes. Dial them on mobile signal, not Wi-Fi.
O2 (pay monthly), giffgaff, Sky Mobile	Standard codes, ring time with `*11*`. Turn Wi-Fi calling off first.
Vodafone (pay monthly)	Standard codes, number as `+44...`, ring time with `*10*`.
Three, iD Mobile, SMARTY	Standard codes. If a divert doesn't seem to work, switch the phone off and on again.
Can't divert: VOXI, Vodafone pay as you go, Asda pay as you go, Lebara, Lycamobile, 1pMobile, old Virgin Mobile plans	You put your Never Miss a Lead number on your website, Google profile and ads instead (section 1). It rings you first.
Check first: Tesco Mobile, EE or O2 pay as you go, Talkmobile, any other network	Try the first code with Wi-Fi off. If it fails, tell us and we'll switch you to a Never Miss a Lead number. Talkmobile charges for diverted calls on top of your minutes.

> **i** **iPhone, Android and costs**
> - **iPhone:** use the codes. Don't use Settings → Phone → Call Forwarding: that sends *every* call away, so your phone would never ring.
> - **Android:** Settings → Calls → Call forwarding with "When unanswered / busy / unreachable" does the same job and is fine.
> - **Cost:** setting, checking and removing a divert is free. The diverted part of a call is charged like a call to a UK mobile, which most monthly plans include.
> - **Leaving?** Dial `##61#`, `##67#` and `##62#` (or `##002#`, then turn your normal voicemail back on).

KNOWING STRAIGHT AWAY · VIDEO 2

5 Your alerts and phone notifications

We tell you straight away by **phone notification** (free, set up below), **text to your mobile** and/or **email**. Text alerts come from your Never Miss a Lead number. Emails come from Never Miss a Lead with an **Open in dashboard** button. Every alert links to the conversation, and most include its 4-digit **#code** so you can reply by text.

Turn on phone notifications

Add the dashboard to your Home Screen and turn on notifications, and every alert (missed calls, voicemails, replies) pops up on your phone like a text and opens the conversation when you tap it. Do it on each phone you want alerts on.

iPhone (iOS 16.4 or later)

1. Open **my.bigbark.media** in **Safari**.
2. Tap **Share**, then **Add to Home Screen**, then **Add**.
3. Open **Never Miss a Lead** from the new **Home Screen icon** (not from Safari).
4. Tap **Settings** and go to **Phone notifications**.
5. Tap **Turn on notifications on this phone**, then **Allow**.
6. Tap **Send a test notification**. Your phone should buzz.

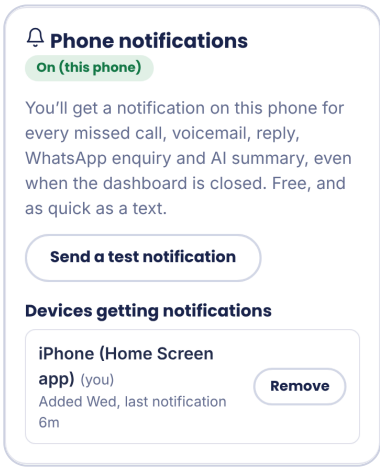

Android

1. Open **my.bigbark.media** in **Chrome**.
2. Tap ⋮, then **Add to Home screen** (or **Install app**), then **Install**.
3. Open **Never Miss a Lead** from its icon.
4. Tap **Settings** and go to **Phone notifications**.
5. Tap **Turn on notifications on this phone**, then **Allow**.
6. Tap **Send a test notification**. Your phone should buzz.

What the status means

On (this phone)	Done. This phone gets every alert.
Off on this phone	Tap **Turn on notifications on this phone**.
Add to Home Screen first	iPhone only: open Never Miss a Lead from its Home Screen icon, not from Safari.
Blocked	You tapped “Don’t Allow”. Turn notifications on for it in your phone’s settings, then come back.

Devices getting notifications lists every phone that’s on. Tap **Remove** to stop one (for example an old phone), or **Turn off on this phone** on the phone itself.

Settings → Phone notifications

What the text alerts say

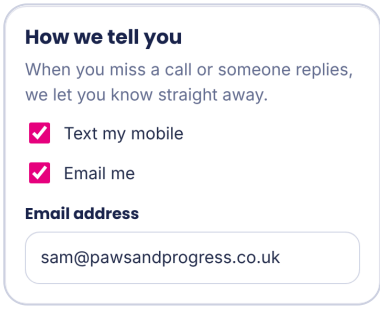

When	Example
Missed call, we texted them	Missed call from 07700 900218. We've texted them. Reply: my.bigbark.media/t/... or text #4821 + your message
Missed call from a landline	Missed call from 01632 960112, a landline, so we couldn't text them. Please call them back. my.bigbark.media/t/...
Voicemail	New voicemail (24s) from 07700 900638. Listen: my.bigbark.media/t/...
They texted back	Reply from 07700 900218: "Hi! It's Tom. Bonnie is 14 weeks..." my.bigbark.media/t/... Reply #4821 + msg
Website enquiry	Website enquiry, Lucy 07700 900561: "Do you do 1-2-1s for a rescue lurcher?..." my.bigbark.media/t/... Reply #2294 + msg
Someone opted out	07700 900123 replied CANCEL and is now opted out of texts. If they meant a booking, call them. my.bigbark.media/t/...

So your phone doesn't buzz non-stop

- If someone sends several texts in a row, you get **at most one text alert per conversation every 10 minutes**. Every message still appears in your dashboard straight away, and email alerts aren't limited.
- Missed-call and voicemail alerts always come through.
- Voicemails shorter than 2 seconds (someone hanging up at the beep) don't get their own alert.

Change how we tell you

1. **Open Settings → How we tell you**
   Tick **Text my mobile**, **Email me**, or both (you need at least one). Text alerts go to the mobile number you gave us; to change it, email or WhatsApp us.
2. **Choose the email address**
   Alerts go to the address in **Email address**.
3. **Tap Save changes**
   The bar at the bottom appears when you've changed something.

Settings → How we tell you

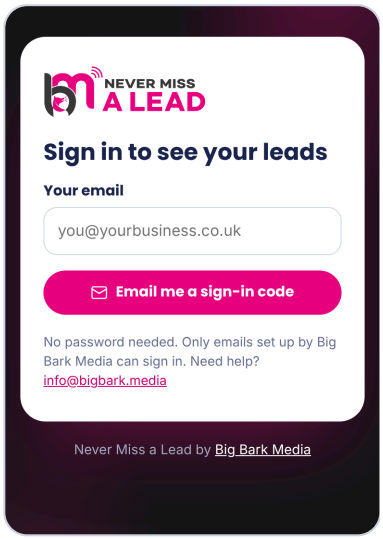

YOUR LEADS IN ONE PLACE

6 Your dashboard

Your dashboard is at **my.bigbark.media**. It works on your phone and your computer. There are four tabs: **Inbox**, **Calls**, **Results** and **Settings**.

Signing in

1. **Go to my.bigbark.media**
   Enter the email address you gave us and tap **Email me a sign-in code**.
2. **Type the 6-digit code**
   from the email and tap **Sign in**. The code expires after an hour. Or tap the link in the same email, on the same phone or computer. No password to remember.
3. **Add it to your Home Screen**
   and turn on phone notifications (section 5). Then it's one tap away.

The sign-in page

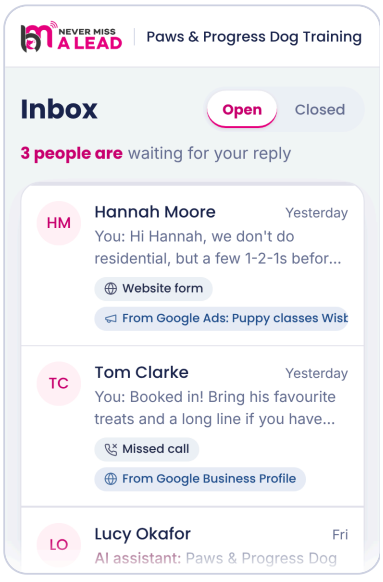

> **Only emails we've set up can sign in**
> If you want a colleague to have access, or you've changed email, email or WhatsApp us and we'll add them.

The Inbox

Every conversation, newest first. The pink ones with a number badge are unread, and the top line tells you how many people are waiting for your reply. Each one shows how it started: **Missed call**, **Website form**.

Everything from the same number (calls, texts, website messages) goes into **one conversation per person**, with one 4-digit code.

Switch between **Open** and **Closed** at the top. On your phone, pull down to refresh.

Inbox

Reading and replying

Tap a conversation to open it. You'll see the whole history: the call (and voicemail), your auto-text, their replies and your replies. Under their name is their number and **Text code #1234**.

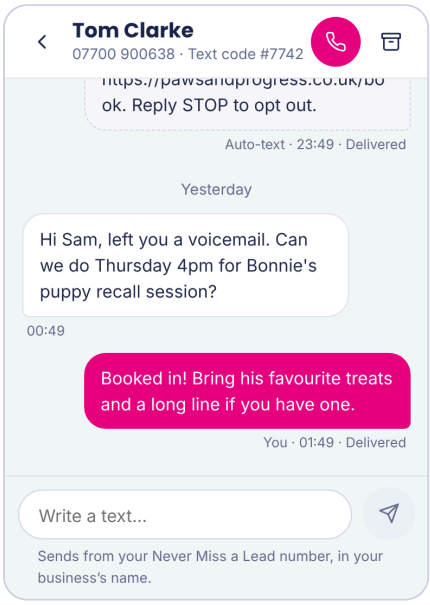

Photos, voice notes, videos and files people send as picture messages show in the conversation.

1. **Type in “Write a text…”**
   at the bottom, and tap the send arrow.

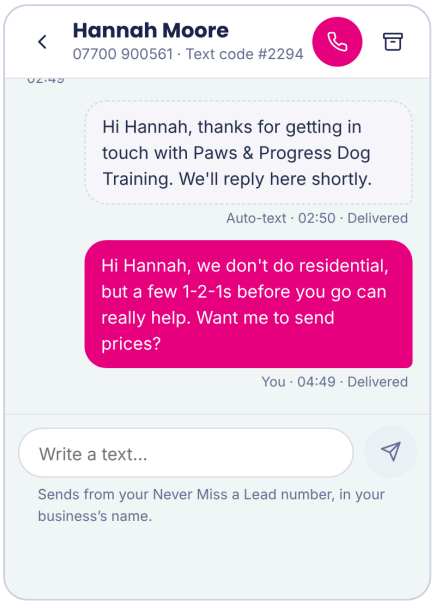

2. **Check the line under the box**
   “Sends from your Never Miss a Lead number, in your business’s name.”

3. **Watch the status**
   Under each message: Sent, Delivered or Not delivered.

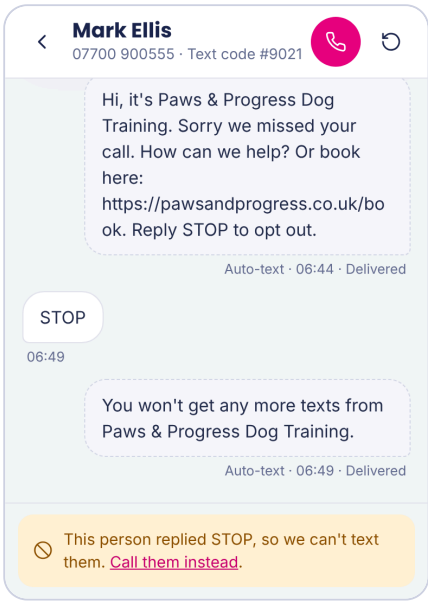

We start your reply with your business name (“Paws & Progress Dog Training: …”) if it isn’t already in it, because every text must say who it’s from. Short is better: a text is 160 characters and longer ones are sent as several.

Tom Clarke: a missed call with voicemail, the auto-text, his reply and yours

A website enquiry: they get a welcome text, you reply

A closed conversation where the person replied STOP

Calling them back

The pink phone button at the top of a conversation rings them from your phone.

Close and reopen

When a conversation is dealt with, tap the **box icon** at the top right (Close). It moves to **Closed**. To bring it back, open it and tap **Reopen it**. If that person calls or texts again, it reopens by itself. Closing doesn’t delete anything.

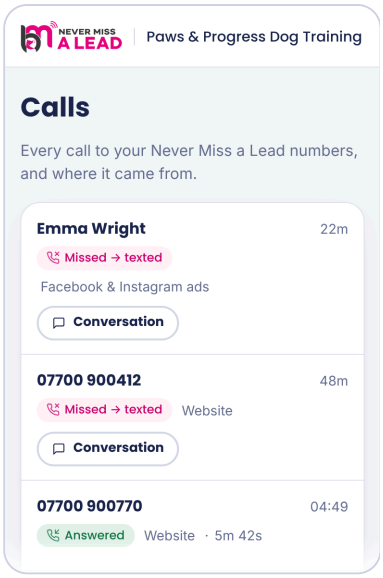

> **Replying to a closed conversation**
> You can’t send from a closed conversation, and its **#code** stops working for text replies. Reopen it first.

Calls and voicemail

The **Calls** tab lists every call that reached Never Miss a Lead. Each call has a label:

- **Missed → texted**: you missed it and we texted them.
- **Voicemail** / **Voicemail, texted**: they left a message.
- **Missed**: we couldn't text them (landline, withheld or overseas) and they left no voicemail.
- **Answered**: only if callers use your Never Miss a Lead number directly and you pressed 1.

Tap **Listen** (Calls) or **Play voicemail** (in the conversation) to hear a voicemail. Tap **Conversation** to jump to the thread.

Calls

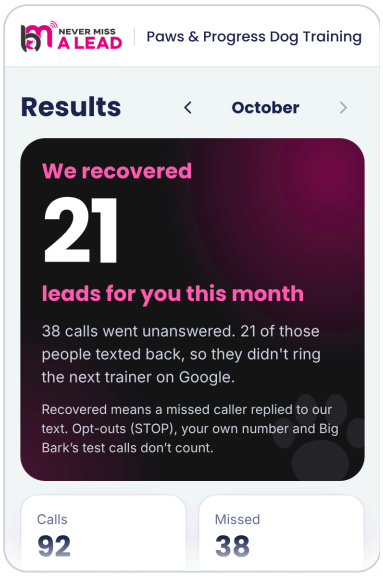

Results and your monthly report

Results shows this month against last month: **Calls**, **Missed**, **Recovered** and **Recovery rate**, then auto-texts sent, replies, a day-by-day chart.

A missed call counts as **recovered** when the caller got in touch after it (replied to your text). Opt-out replies (STOP) and test calls don't count.

On the 1st of each month we email you a report for the month before.

> **No calls showing?**
> If you're expecting calls and Results shows none, check your diverts are still on: dial `*#61#`.

Results

Settings

Change these yourself any time. Make your changes, then tap **Save changes** in the bar at the bottom (or **Undo**).

Text we send when you miss a call (your auto-text)

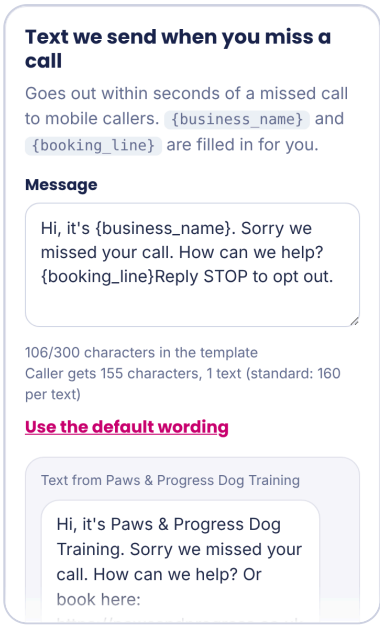

- Up to 300 characters. It must include **{business_name}** (or your business name) and tell people they can reply **STOP**. These are legal requirements, so the dashboard won't save it without them.
- **{booking_line}** becomes "Or book here: your-link." when you've added a booking link, and disappears when you haven't.
- The preview shows exactly what callers get. **Use the default wording** puts ours back.

Booking link

A full web address starting **https://**. Leave it blank if you don't take online bookings.

Voicemail greeting

What callers hear before the beep. Leave it blank for ours: "Sorry we missed your call. Please leave a short message after the tone and we'll call you back. Messages are recorded." **Your own greeting must say messages are recorded** (the dashboard won't save it otherwise).

Settings → Text we send when you miss a call

Also in Settings: Phone notifications and **How we tell you** (section 5), your website button (section 9), **Divert codes** (section 4), **Answering your calls** (only matters if callers use your Never Miss a Lead number directly: the press-1 switch and how long it rings you, 12 seconds by default, 8 to 30), **Appearance**, **Billing and plan** and **Account** (Sign out).

NO DASHBOARD NEEDED

7 Replying by text with #codes

Not near a computer? Reply by text. Every conversation has a 4-digit code, shown in your alerts and at the top of the conversation (**Text code #4821**).

1. **Text your Never Miss a Lead number from your own mobile**
   The number your text alerts come from. It must be the mobile number we have for you.
2. **Start with # and the code, then your message**
   `#4821 Yes, there's space on Saturday's puppy course`
3. **We pass it on**
   Tom gets: “Paws & Progress Dog Training: Yes, there’s space on Saturday’s puppy course”, from your Never Miss a Lead number. It appears in the dashboard as your reply.

You reply to the alert, starting with the code

If you forget the code

Text anything without a code (or a wrong code) and we text you back your most recent open conversations:

> **WHAT YOU GET BACK**
> To reply, start your text with their code, e.g. #1234 See you at 3. Recent: #4821 Tom Clarke 07700 900218; #2294 Lucy 07700 900561. https://my.bigbark.media

Your text isn’t sent to anyone, so just send it again with the right code.

Good to know

- The space after the code is optional: `#4821 Thanks`, `#4821: Thanks` and `#4821Thanks` all work.
- Codes only work for **open** conversations. Reopen a closed one in the dashboard first.
- If the person has opted out, we text you that we couldn’t send it, so please call them instead.
- Your #code texts are ordinary texts from your phone, charged like any text on your plan.

STAYING ON THE RIGHT SIDE OF THE LAW

8 STOP and opt-outs

Every text we send names your business and, for the first one, tells people they can reply STOP. That's the law (PECR and UK GDPR), and it protects your reputation too.

Opt-out words	`STOP`, `STOPALL`, `UNSUBSCRIBE`, `CANCEL`, `END`, `QUIT`, sent as the whole message (capitals don't matter).
What they get	One confirmation: "You won't get any more texts from Paws & Progress Dog Training."
What you get	**An alert every time someone opts out**, for example "07700 900123 replied STOP and is now opted out of texts." For **CANCEL**, **END** or **QUIT** it adds "If they meant a booking, call them.", because people sometimes text "Cancel" meaning their session.
In the dashboard	The conversation says the person opted out, so call them instead. The reply box is switched off, #code replies are refused, and we don't send them missed-call texts again.
Opting back in	If they text `START` (or `UNSTOP`), they get "You're opted back in to texts from ... Reply STOP to opt out." and everything works again.

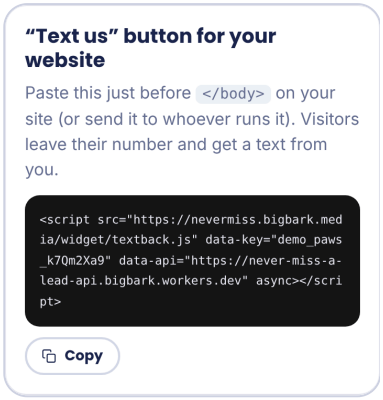

> **Please respect it outside Never Miss a Lead too**
>
> If someone has opted out, don't text them from your personal phone either. You can still ring them back if they asked you to, or if they call you again. Messages like "stop texting me" or "wrong number" aren't automatic opt-outs, so treat them as one and stop texting that person.

Opt-outs apply to your business only. Your website form can't undo an opt-out: if someone who opted out fills it in, you get the enquiry and an alert asking you to call them, but we don't text them. The thank-you message on the form tells every visitor that if they've ever replied STOP, they can reply START to switch texts back on.

MORE ENQUIRIES FROM YOUR WEBSITE

9 Your website “Text us” button

A small **Text us** button sits in the corner of your website. Visitors tap it, leave their name, UK mobile number and a message, and tick “I agree to receive text replies about my enquiry.”

Settings → “Text us” button for your website

When someone uses the form

1. **They get a text straight away**
   “Hi Lucy, thanks for getting in touch with Paws & Progress Dog Training. We’ll reply here shortly.”
2. **You get an alert**
   “Website enquiry, Lucy 07700 900561: …” with the #code.
3. **You reply**
   From the dashboard or with the #code. It shows in your inbox as **Website form**.

Adding it to your site

1. **If Big Bark hosts your website, we add it for you.**
   Nothing to do.
2. **Otherwise, copy the code**
   Dashboard → **Settings** → **“Text us” button for your website** → **Copy**, and paste it just before **</body>** (or send it to whoever looks after your site).
3. **Tell us your website address**
   The button only works on websites we’ve approved for your account.

Built-in protection

- UK mobile numbers only (07…) for texts.
- Up to 5 messages an hour from the same visitor, and 50 a day for your business, so spammers can’t run up texts.
- A hidden trap field catches spam bots.
- We record the time they ticked the consent box.

Want WhatsApp ads and a “WhatsApp us” button?

WhatsApp is on Smart Text and AI Receptionist. Ask us and we’ll move you up the same day.

THE SMALL PRINT, IN PLAIN WORDS

10 Your trial, billing and account

Free trial	7 days, no setup fee. It starts on the day your number goes live. Your card is taken at sign-up but nothing is charged during the trial, and we email you 3 days before it ends. Cancel before the end and you pay nothing.
Prices	£49 a month inc. VAT (£39 if Big Bark hosts your website), monthly in advance by card through Stripe. Or £490 a year (2 months free); ask us to set it up. All prices include VAT.
Skipping the trial	A one-off setup fee of £99 inc. VAT with your first month.
Changing plan	Ask us by email or WhatsApp and we switch it the same day (plan changes aren't in the billing page).
Pausing or cancelling	No contract and no minimum term. Pause or cancel yourself in **Settings → Billing and plan** (section 11), or email or WhatsApp us. Cancelling takes effect at the end of the billing period you've paid for (or the end of your trial).

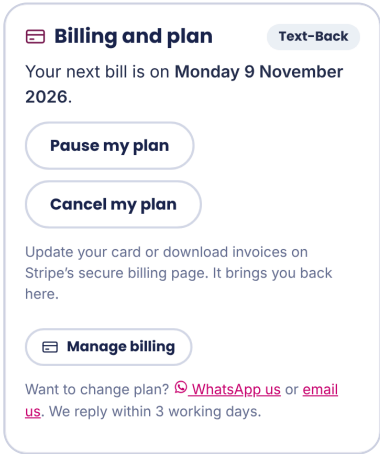

★ **30-day lead guarantee**

The 30 days start on the day your number goes live. If we don't recover at least one enquiry for you in those 30 days, ask us and your next month is free. "Recovered" means a missed caller replied to our text, or (on Smart Text and AI Receptionist) the AI took their details. Opt-outs (STOP) and test calls don't count. Ask by email or WhatsApp within 14 days of the 30 days ending. Once per business.

Your card and invoices

1. **Settings → Billing and plan**
   It shows your plan and when your next bill (or your free trial) ends.
2. **Tap Manage billing**
   This opens Stripe's secure billing page.
3. **Update your card or download invoices**
   Then come back with the link on that page. To pause or cancel, use the buttons in Billing and plan (section 11).

Only the account owner sees Billing and plan.

Settings → Billing and plan

If a payment fails

We email you straight away with an **Update your card** button, and Stripe usually retries the payment. Everything keeps working for 7 days. After that, texts, alerts and dashboard replies pause until it's paid. Your phone still rings as normal, and callers can still leave a voicemail, which we email you. As soon as the payment goes through, everything switches back on.

Your customers’ data

You’re in charge of your customers’ data and we handle it for you under a data processing agreement. Add the privacy wording we give you to your website’s privacy policy. Message contents, voicemails, AI transcripts and summaries are deleted after 12 months. We keep a basic log of calls (number, time, outcome) while you’re a client, for billing and support.

YOUR CHOICE, IN THE DASHBOARD

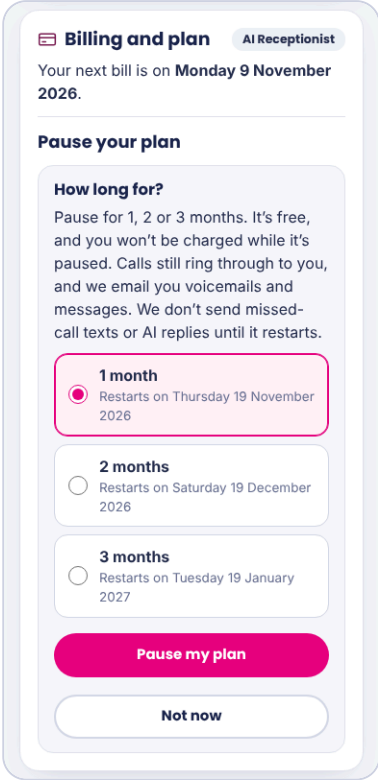

11 Pausing or cancelling

You can pause or cancel yourself, any time, in **Settings → Billing and plan**. No need to message us (but you can: email info@bigbark.media or WhatsApp 07822 882162).

Pause your plan

1. **Open Settings → Billing and plan**
   in your dashboard.
2. **Tap Pause my plan**
3. **Choose 1, 2 or 3 months**
   Each option shows the date it restarts.
4. **Tap Pause my plan**
   We email you the details ("Your plan is paused until {date}").

- **It's free:** you won't be charged while it's paused.
- **Once in any 12 months**, on monthly plans. Not during your free trial, and not while a cancellation is booked (undo it first). Yearly plans can't be paused.
- **It restarts by itself** on the date shown. We email you 3 days before. To restart early, tap **Resume now**.

Settings → Billing and plan → Pause my plan

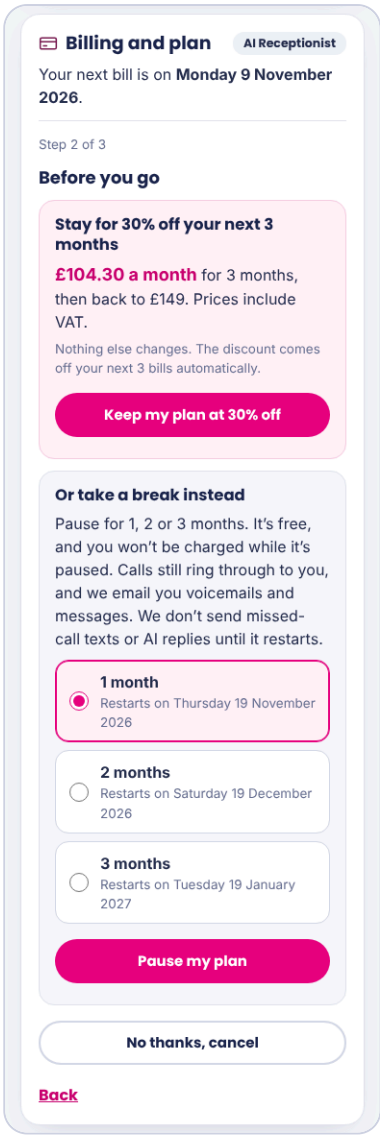

While you're paused

Still works	Calls ring through to your phone as normal. Missed callers hear your voicemail greeting, and we email you every voicemail. Texts and website enquiries come to your dashboard and we email you (and send phone notifications). You can still reply by hand from the dashboard or with a #code.
Stops until you restart	Missed-call texts and text alerts to your mobile.

Cancel your plan

1. **Open Settings → Billing and plan**
   and tap **Cancel my plan**.
2. **Pick the main reason**
   and tap **Next**. It helps us improve.
3. **Maybe an offer**
   We may offer you 30% off your next 3 months, or a pause instead. Tap **Keep my plan at 30% off** or **Pause my plan** to stay, or **No thanks, cancel**.
4. **Check the date and tap Cancel my plan**
   "Your plan ends on {date}. Until then everything keeps working."

- It ends at the end of the billing period you've paid for. You won't be charged again.
- Changed your mind? Tap **Undo cancellation** any time before that date.
- Cancelling during your free trial: it just ends, and nothing is charged.
- The 30% offer is our choice, not a right: it's once per business, on monthly plans, and not during a free trial.

Cancel my plan, step 2: an offer to stay (example prices)

When your plan ends

1. **We email you "Your plan ends on {date}"**
   with how to remove your diverts: dial `##61#`, `##67#` and `##62#` (or `##002#`, then turn your normal voicemail back on).
2. **After your plan ends**
   any calls still diverted to us hear "Sorry, Paws & Progress Dog Training can't take your call right now. Please try again later." (with your business name), so please remove your diverts. If you published your Never Miss a Lead number, it keeps ringing through to you for 30 days so you can update your listings, then stops working.
3. **30 days after your plan ends**
   we email you your data (spreadsheet files of your conversations, messages and calls) and then delete your callers' data.

SORTING THINGS OUT

12 Troubleshooting and FAQ

Still stuck?

Watch the setup videos at **nevermiss.bigbark.media/setup/**, or email **info@bigbark.media** or WhatsApp **07822 882162** (https://wa.me/447822882162). We reply within 3 working days. Tell us your business name and, if it's about a particular customer, their #code.

A caller says they didn't get a text.

Texts only go to UK mobiles (07...). Landlines, withheld and overseas numbers can't get one. We also don't text the same person twice within 30 minutes, or anyone who has opted out. Check the call in the Calls tab: "Missed → texted" means it was sent.

Missed calls go to my old voicemail.

Your divert isn't on. Dial *#61# to check, then set it again (section 4). Diverts can be lost when you change SIM, phone or network.

My phone doesn't ring before calls divert.

Your network is diverting too early. Use **61*NUMBER*11*25# (Vodafone *10*) to ring for 25 seconds first.

I'm not getting phone notifications.

Open Never Miss a Lead from your Home Screen icon, then Settings → Phone notifications. It should say On (this phone). "Add to Home Screen first" means you opened it in the browser; "Blocked" means notifications are off in your phone's settings. Then tap Send a test notification. iPhones need iOS 16.4 or later (section 5).

I'm not getting text or email alerts.

Check Settings → How we tell you: at least one of Text my mobile / Email me must be ticked. Check your spam folder.

I texted a #code and the customer didn't get it.

Check the code and that you texted from the mobile number we have for you. Codes only work on open conversations. If we couldn't find the code, we will have texted you your recent codes.

My sign-in code doesn't work.

Codes expire after an hour, and only the newest one works. Tap Use a different email to start again and ask for a new one. The link in the email only works on the same device. If it says your email isn't set up, email or WhatsApp us.

The reply box is greyed out.

Either the person opted out, the conversation is closed (tap Reopen it), or the number can't get texts (landline, withheld or overseas). Call them instead.

Will my customers know it's automatic?

The auto-text is in your words and comes from your Never Miss a Lead number, in your business's name.

What if I change my mobile number?

Email or WhatsApp us before you switch, so alerts and #code replies go to the new number, then set up your diverts again on the new phone.

Can someone ring me to help set it up?

We don’t do phone support. The setup videos at nevermiss.bigbark.media/setup/ walk you through every step, and we answer emails and WhatsApps in writing (within 3 working days), so you’ve always got the answer to look back on.

NEVER MISS A LEAD

Quick reference

Text-Back plan · keep it by your phone

Divert codes (replace NUMBER)

No answer	`**61*NUMBER#`
Busy / declined	`**67*NUMBER#`
Off / no signal	`**62*NUMBER#`
Check	`*#61#`
Ring 20s first	`**61*NUMBER*11*20#`
Remove	`##61#` `##67#` `##62#`

Vodafone: `*10*` instead of `*11*`. My Never Miss a Lead number: _____

Dashboard

- **my.bigbark.media**: **Email me a sign-in code**, type the 6 digits.
- Phone alerts: Home Screen icon → **Settings → Phone notifications**.
- **Inbox** · **Calls** · **Results** · **Settings**
- Auto-text, greeting, booking link, alerts: **Settings**, then **Save changes**.
- Pause or cancel: **Settings → Billing and plan**. Card, invoices: **Manage billing**.

Reply by text

Text your Never Miss a Lead number:

`#4821 Yes, Thursday at 10 is free`

Forgot the code? Text anything and we'll send your recent codes.

Opt-outs

- **STOP** (or STOPALL, UNSUBSCRIBE, CANCEL, END, QUIT): no more texts. You get an alert.
- CANCEL / END / QUIT may mean a booking: call them.
- **START**: back on.

Calls and texts

- Texts go to UK mobiles (07...) only.
- Not twice within 30 minutes.
- Landline / withheld: voicemail only. Call them back.
- Phone can't divert? Callers use your Never Miss a Lead number: **press 1** to take the call.
