NEVER MISS A LEAD

WHATSAPP SET-UP · SMART TEXT AND AI RECEPTIONIST

Get enquiries on WhatsApp

Customers who'd rather WhatsApp than text can message your Never Miss a Lead number, and their messages land in the same inbox as your texts. You do three quick jobs (about 5 minutes, on a computer). We do the rest.

PART 1 You do this

About 5 minutes, on a computer

1 Open your Meta business settings

☐

On a **computer**, go to **business.facebook.com/settings** and sign in with the Facebook account that runs your business page.

If you already run Facebook or Instagram ads, you have a business portfolio: pick your business at the top. If you don't have one, follow Meta's prompts to **create a business portfolio** in your business's name.

2 Invite Big Bark

☐

1. Under **Users**, click **People**
2. Click **Invite people**
3. Type **info@bigbark.media**
4. Choose **Full access** (not Partial access)
5. Skip choosing assets
6. Click **Invite**

It worked if info@bigbark.media shows in your People list as **Pending**.

We need full access just for the set-up: it lets us create your WhatsApp account inside your business portfolio, so it stays yours.

3 Tell us it's done

Email **info@bigbark.media** or WhatsApp **07822 882162**: "Meta invite sent" and your business name.

Haven't sent us your logo yet? Attach it: square, at least 640 × 640 pixels.

- [ ]

PART 2 Then — We set it up and you test it

1 We set it up

You don't need to do anything. We register your **Never Miss a Lead number** as your business's WhatsApp number and set up your WhatsApp Business profile from your onboarding form: name, about line, description, email, website and logo.

It takes us a few minutes once we're in. We email you when it's live.

- [ ]

2 Test it

From your own WhatsApp, send a message to your **Never Miss a Lead number**.

It worked if it shows in your dashboard with a **WhatsApp** badge.

- [ ]

3 Lower our access (optional)

1. Go back to **business.facebook.com/settings**
2. Click **Users → People**
3. Click **info@bigbark.media**
4. Change to **Partial access**, or remove us

If you remove us, we'll ask you to invite us again if your WhatsApp profile ever needs changing.

- [ ]

PART 3 Good to know

- **Your own WhatsApp doesn't change.** Keep using it for friends, clients and groups.
- **Your display name** must match your business name on your website exactly, with the same spelling and capitals. Not just a place or a word like "Dog Training". WhatsApp allows one change every 30 days.
- **Meta may ask to verify your business.** It's free: Business settings → **Security Centre**. Have your business documents handy. It can take a few days to a few weeks.
- **The 24-hour rule:** you can reply on WhatsApp for 24 hours after the customer's last message. After that, your reply goes as a normal text.
- **We never start WhatsApp chats.** The customer always messages first.
- **Fair use:** up to 500 new WhatsApp enquiries a month. If you're regularly above that, we'll talk to you first. We never block enquiries.

Stuck?

Email **info@bigbark.media**
or WhatsApp **07822 882162**

Tell us your business name and what you see on screen (a screenshot helps). We reply within 3 working days.
